New Warranty for Robinson Helicopters

Torrance, CA – Robinson Helicopter Company has announced a new warranty for all new R22 and R44 helicopters, which covers both parts and labor. The cost for removal and reinstallation of defective parts replaced under the previous Robinson Limited Aircraft Warranty was not covered.

The new warranty is effective for claims processed after 1 Feb 03 and will cover both parts and labor for two years or 1,000 hours, whichever occurs first. However, the labor warranty applies only to labor performed by the Dealership that sold and delivered the new aircraft to its original owner. The provision will encourage buyers to purchase their new aircraft from a qualified dealer in their local area, and will give the Dealer an incentive to provide the best after-sale support for the aircraft.

Robinson is the world's leading manufacturer of civil helicopters and builds the two-seat R22 and four-seat R44 helicopters. For more information, visit www.robinsonheli.com.
